Good afternoon all – My apologies for the delay in sending this. We have had a lot going on here, and I’m afraid I got too hung up on trying to get everything out in one email. In addition to the attachments, below are the action items I captured as memory joggers. There’s likely a more savvy way to make these documents available, but what I’m aware of here at EPA tends to be rather cumbersome (I’m open to ideas for the future if you all have suggestions). I did not scan the state handouts but am sharing some additional organizational info from CO. If there’s anything I’ve forgotten, please let me know. I’ll send out another follow-up email when I have more info on the few outstanding actions. Thanks again for your participation and a productive meeting!

Action Items:

- Cindy Beeler offered to provide webinar training on the compliance alert; ND and CO both expressed interest and Cindy indicated she would follow up with Chris and Jim. Gail sent Cindy a reminder today.
- Gail agreed to provide link to EPA R8 delegations web page. We learned that there has been ongoing work on the delegations chart and that it was dropped from the web page. An updated chart is undergoing management review and is anticipated to be made available within a week to the PPA/PPG coordinators in each R8 state. In case this is helpful, here is a link to the R8 NSPS/NESHAP delegations: <https://www.epa.gov/region8/delegations-authority-nsps-and-neshap-standards-states-and-tribes-region-8>
- Gail offered to provide copies of two memos that Lori discussed on title V evaluations and fees guidance documents. These are attached to this email. Lori shared that Juan Santiago (EPA OAQPS) said he is interested in receiving feedback from states on these. Gail is checking with OAQPS about how such feedback should be provided.
- DJ will be sending an email to the group about sharing information with EPA on the minor source baseline dates for areas around Indian country lands. In addition, either he or Gail will initiate discussions with states on setting up monthly calls.
- Gail will follow up on status of electronic reporting rule for NSPS. There is a national EPA air managers meeting next week where this will be discussed.
- Andrew agreed to share info with Chris about what oil and gas operators have considered in WY for contingency plans (for ozone action days?).

Thanks,
Gail Fallon
